Miller Statement on September Unemployment Report

WASHINGTON, DC- Rep. Gary G. Miller (CA-31) released the following statement regarding the Department of Labor's unemployment report for September 2013.

Congressman Miller: "Today's unemployment report once again fell short of expectations. Our economy, saddled by failed stimulus projects and mired in red tape is unable to create the jobs and growth needed for a successful economic recovery. That is why I have continued to push for pro-growth policies such as supporting the global competitiveness of U.S. companies and ensuring a stable and healthy housing market. These reforms will strengthen our economy and provide jobs for Inland Empire residents and Americans across the country."
